In claim 14, "cysteine/cysteinate" is confusing and would be clearer if phrased as  
– the at least one of a cysteine and a cysteinate --.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all  
obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18,19 are rejected under 35 U.S.C. 103(a) as being unpatentable over  
Laude '723.

Laude teaches a gold electrodeposition bath containing solution of a gold  
compound. See example 1.

Laude differs in not teaching the instantly claimed process of making the gold  
compound.

Any difference imparted by the product by process limitations would have been  
obvious to one having ordinary skill in the art at the time the invention was made  
because where the examiner has found a substantially similar product as in the applied  
prior art the burden of proof is shifted to the applicant to establish that their product is  
patentably distinct not the examiner to show the same process of making, In re Brown,  
173 USPQ 685, In re Fessmann, 180 USPQ 324, In re Spada, 15 USPQ2d 1655, In re  
Fitzgerald, 205 USPQ 594, and MPEP 2113.

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kroll '343.

Kroll teaches the instantly claimed gold compound solution but differs in that the instantly claimed process is not stated. See the abstract.

Any difference imparted by the product by process limitations would have been obvious to one having ordinary skill in the art at the time the invention was made because where the examiner has found a substantially similar product as in the applied prior art the burden of proof is shifted to the applicant to establish that their product is patentably distinct not the examiner to show the same process of making, In re Brown, 173 USPQ 685, In re Fessmann, 180 USPQ 324, In re Spada, 15 USPQ2d 1655, In re Fitzgerald, 205 USPQ 594, and MPEP 2113.

Claims 12-17,20 appear allowable over the cited prior art of record as it does not teach or suggest the instantly claimed combination of process steps.
